

Important Aftercare Information

Post treatment guidance should be followed by all clients:

- Avoid washing your face or area that has been treated for 6 hours post treatment
- Avoid scratching or rubbing the area treated
- Avoid washing with excessively hot water
- An appropriate moisturiser should be applied every day following treatment for at least 7 days to help maximise treatment results
- Over exposure to the sun should be avoided
- Saunas should not be used for one week
- A good sunscreen SPF 20+ should be applied regularly to the treatment area
- Some redness on the skin is normal and should subside quickly, but if it does not or any abnormal side effects are experienced, your therapist/clinic should be contacted immediately so that appropriate advice can be given
